

14500 Battery Cell Factory

Overview

What is a 14500 battery?

A 14500 battery is a lithium-ion rechargeable cell with the same dimensions as a standard AA battery (14mm x 50mm) but delivers a significantly higher voltage (3.6V or 3.7V nominal).

What is a 14500 cell used for?

Designed for compact, high-efficiency power applications, 14500 cells are commonly used in tactical flashlights, medical equipment, wireless sensors, and industrial electronics. Voltage: 3.6V – 3.7V nominal, with a full charge voltage of 4.2V and a discharge cutoff of 2.5V – 3.0V.

What is the difference between protected and unprotected 14500 batteries?

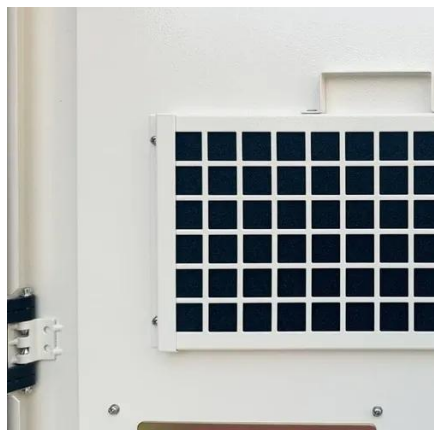

Protected 14500 Batteries: Feature an integrated protection circuit to safeguard against overvoltage, deep discharge, and short circuits. **Unprotected 14500 Batteries:** Preferred for battery packs or regulated devices with built-in safety management.

What is the discharge rate of a 14500 cell?

Discharge Rate (CDR): Certain high-drain 14500 cells offer discharge rates of 3A – 10A, suitable for demanding applications. **Cycle Life:** Can exceed 500 to 1000+ charge cycles, depending on proper maintenance and chemistry type.
