

# 2 kW solar energy price

## Overview

---

On average, a 2 kW solar panel system costs \$6,360, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state.

On average, a 2 kW solar panel system costs \$6,360, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state.

A 2 kW solar panel system is enough to power a small RV—but it'll cost you about \$6,360. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed.

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.

A 2kW solar system can generate 2 kilowatts of power under ideal conditions, typically comprising around 5-8 solar panels depending on the efficiency and wattage of the panels used. As of 2024, the average cost of a 2kW solar system in the United States ranges from \$4,000 to \$6,000 before.

The cost of 2 kW solar panels is subject to market fluctuations and varies based on different types and dimensions. When selecting solar panels, it's crucial to consider inverter specifications. In 2023, the average 2kW solar system price associated with setting up a solar panel system in the USA.

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when.
