### What Is a 24VDC Uninterruptible Power Supply?

A 24VDC Uninterruptible Power Supply is a type of electrical device designed to deliver continuous, stable 24V direct current to any connected load. In the face of power outages, voltage sags, or other electrical disturbances, it kicks into action.

Uninterruptible Power Supply (UPS) systems provide power to computer networks in the event of a power shortage or electrical outage so computers and other sensitive electronic equipment can be turned off properly. UPS system batteries keep systems running and help prevent data loss in the event of.
