

60 negative 32A inverter

Overview

What is a smart inverter/charger?

Smart, resilient inverter/chargers for off-grid, marine, mobile, backup, and energy storage—modular and configurable to fit any professional energy system.

What voltage does a Multiplus inverter/charger use?

Select the nominal voltage of your battery system (e.g., 12V, 24V, 48V). Our extremely resilient and versatile MultiPlus inverter/chargers feature one AC-input and two AC-outputs, ensuring critical loads are always powered, even if shore, grid, or generator power fails.

What if the inverter is not working?

The inverter also has over-temperature protection if the temperature is high. Then the inverter will automatically reduce the working output efficiency. Or stop working. After cooling down, restart. It is recommended to install the inverter in a ventilated, dry and cool place.

Why do inverters stop working after cooling down?

The inverter uses aluminum alloy material. Metal can conduct heat better. The inverter also has over-temperature protection if the temperature is high. Then the inverter will automatically reduce the working output efficiency. Or stop working. After cooling down, restart.
