With an AC unit, you get to work your way around the storage unit a lot more comfortably. What this does is it extracts the heat from the container's interior and lowers the temperature to the desired level—a great feat for the stored perishable goods that require a cool environment. This may also.

Shipping containers are built to be strong, secure, and weather-resistant, but that doesn't make these durable units immune to the effects of extreme heat. Without the proper modifications and precautions, these storage containers can virtually turn into ovens during the summer months, especially.

Window air conditioners are pretty easy to install and come in many affordable options, making them a popular climate control solution for shipping containers. These are best for small or temporary temperature-controlled shipping units, areas with moderate heat levels, or smaller personal projects.
