## Overview

---

The U.S. government has finalized severe tariffs on imports of solar panels from four Southeast Asian countries, in connection with a complaint filed last year by major U.S.-based solar manufacturers.

The U.S. government has finalized severe tariffs on imports of solar panels from four Southeast Asian countries, in connection with a complaint filed last year by major U.S.-based solar manufacturers.

On April 21, 2025, the U.S. Department of Commerce finalized new tariffs on solar panels and components imported from Malaysia, Thailand, Cambodia, and Vietnam. The decision stems from findings that certain Chinese companies circumvent existing tariffs using factories in these countries. Here's.

According to a report by PL Capital, India's solar industry is finding a major customer in the United States. The reason can be attributed to the U.S. restricting imports from China-linked supply chains. As a result, the U.S. became the main buyer, taking about 97 per cent of India's solar module.

India's solar modules captured 97% of its exports to US (2023-25), up 9x in '23 & 2x in '24, as 19-21% cheaper alternative to US-made amid China curbs. Share rose to 11% vs Vietnam's 36%; US added 50GW capacity. But 50% tariff hits Aug 2025 over dumping, Russia oil. India eyes 180GW module and.

U.S.-based manufacturers say that Chinese companies based in Cambodia, Vietnam, Thailand, and Malaysia are dumping cheap solar panels on the American market. The U.S. government has finalized severe tariffs on imports of solar panels from four Southeast Asian countries, in connection with a.
