

All black components with white chassis

Overview

I built this simple gaming PC build for @PhysicalRadio as requested, with a black case and white components on the inside. Hope you enjoy this quick build! Check out Physical Radio's video as well: • Our Radio Station's New Beast: GIGABYTE RT.

A subreddit to show off your Corsair build, discuss new releases and find Corsair related news! Any white cases with black components?

I got all black PC. But i want to upgrade some things to white since my desk is white (mousepad, audio mixer, maybe future white mouse and keyboard both screens are.

Gaming PC built with half white and half black components for a contrast in colors.

The colors of the build. AMD Ryzen 7 7700X Raphael AM5 4.5GHz 8-Core Boxed Processor - Heatsink Not Included MSI B650-P PRO WiFi AMD AM5 ATX Motherboard XFX AMD Radeon RX 6800 SPEEDSTER SWFT319 Overclocked Triple.

All black components with white chassis

Opinions on how a white motherboard in a black case would look.

I can't even find any pics of builds with all black cases and all white motherboards. Anyone have a build like this or have pics of anything similar just to get an idea of how (bad) it would look?
