Lithium-ion batteries are powering more of our everyday devices—from e-bikes and power tools to smartphones and children's toys. Their compact size and high energy capacity make them incredibly useful, but they also carry a risk of fire if misused or damaged. A recent house fire in Vilas County was.

other technologies. While misuse of tools and batteries can lead to unsafe situations, operation has become safer by removing restrictive power cords and handling too with proper care. Choose safety and always use batteries for their explosion hazard. Damage from improper use, storage, or charging.

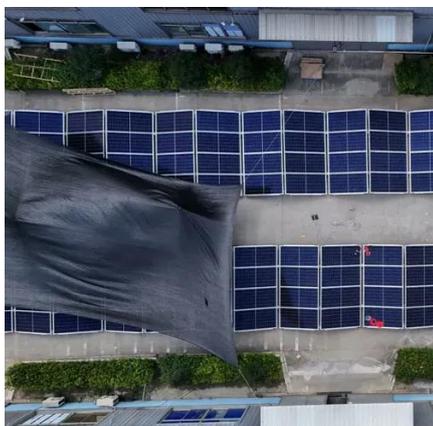

Lithium-ion batteries require special care when not in use to ensure their longevity and performance. Here are some guidelines on how to store them effectively: Recharge batteries once they drop to about 20% to 30%. Handle them with care

and keep out of children's reach. Avoid contact with metal.
