

Assembly of solar container outdoor power in Antwerp Belgium

Overview

How many solar panels are being installed in Antwerp?

Indaver is building a solar park with 32,000 solar panels on two former landfills in the port of Antwerp. The sites will thus get a second life and the company wants to do its bit for sustainable energy supply. Work is in full swing: about 300 solar panels are being installed every day.

Why are solar panels being added to a landfill in Antwerp?

Landfill gas was used to produce electricity at the site, thus closing energy and material loops, indicating a change towards more environmentally friendly waste handling. In the port of Antwerp, solar panels are now being added to 32,000 panels at the former Hooze Maey landfill.

How much solar energy does Antwerp use a day?

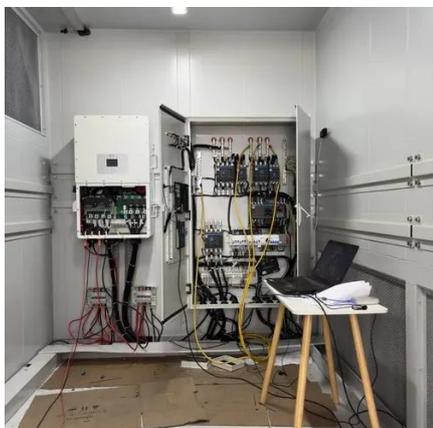

Average 2.33kWh/day in Autumn. Average 1.17kWh/day in Winter. Average 4.56kWh/day in Spring. To maximize your solar PV system's energy output in Antwerp, Belgium (Lat/Long 51.2192, 4.3917) throughout the year, you should tilt your panels at an angle of 43° South for fixed panel installations.

How to optimize solar generation in Antwerp Belgium?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Antwerp, Belgium as follows: In Summer, set the angle of your panels to 35° facing South. In Autumn, tilt panels to 54° facing South for maximum generation.
