Tell us and we will take a look. The Australian government announced the introduction of import tariffs through Tariff Concession Order No. 23/46 on Lithium.

We are updating the FTA Portal to reflect US tariff announcements, including relating to Australian aluminium and steel exports, and other products (<https://>). The FTA Portal is being progressively updated to reflect more flexible AANZFTA.

For businesses looking to import solar panels and batteries, this presents new opportunities through increased demand and lower upfront costs. The SRES Scheme is based on tradable certificates called Small-scale Technology Certificates (STCs). To be eligible for STCs, your solar system must be.

Lithium batteries, both lithium-ion and lithium-metal, are subject to strict import controls in Australia due to their classification as dangerous goods. Ensuring compliance isn't just best practice, it's mandatory. Here's what freight forwarders, customs brokers, and importers need to know. 1.

Customs brokers, importers, self-reporting importers, freight forwarders, and accredited persons operating under the class 19.1 non commodity for containerised cargo clearance approved arrangement associated with the

reporting of FCLs of solar panels (tariff codes 854142, 854143 and 854149) that.
Can I import solar panels into Australia?

This requirement means you should first ensure that any solar system you intend to import into Australia is on the list approved by CEC. The Cheaper Home Batteries Program is an extension of the SRES, supporting households and businesses by providing a discount of approximately 30% on the upfront cost of installing eligible small-scale batteries.

Why should businesses import solar panels & batteries?

For businesses looking to import solar panels and batteries, this presents new opportunities through increased demand and lower upfront costs. The SRES Scheme is based on tradable certificates called Small-scale Technology Certificates (STCs).

How will US tariffs affect Australia's solar industry?

While these tariffs primarily target imports into the United States, their ripple effects are being felt as far afield as Australia's burgeoning solar and renewables industry. In early April 2025, the US government announced a 10% baseline tariff on imports, including those from Australia, effective 5 April 2025.

How will tariffs affect Australia's renewables sector?

For the renewables sector, particularly solar, this translates to increased costs for imported components and potential delays in project timelines. The Minerals Council of Australia has voiced concerns, stating that these tariffs will not only hurt Australian exporters but also drive up costs for US consumers. A silver lining amidst the clouds?
