

Bogotá Tunnel Uses Solar-Powered Containers for Fast Charging

Overview

With two solar panels atop each cable car, the system called "TransMiCable" transports about 20,000 residents a day living in the southern neighbourhood of Ciudad Bolivar, up and down the mountain in under 15 minutes and for less than \$1 per journey.

Discover how Bogota's innovative cable car system is revolutionizing transportation, connecting suburbs, and reducing car traffic. For decades, Bogota's marginalized hillside communities faced significant challenges in accessing basic services, education, and employment opportunities due to the.

Recently, our head of electric mobility, Fernando Vélez, was interviewed at the

Mobility Portal, one of the country's most important digital media, and there he spoke about our initiative and in general about Celsia's commitment to sustainable mobility with electric vehicle charging stations. Here.
