The most common type of inverter in Romania is a grid-connected one. These inverters help solar panels send the electricity they make directly to the power grid. With these inverters, people can lower their electricity bills, and if there's extra power, the grid pays them for it. That's called net.

Ultra Solar is a trusted supplier of photovoltaic equipment, offering a wide range of high-quality solar products, including solar inverters. The company's commitment to providing top products helps customers optimize their solar energy systems and reduce energy bills. Trina Solar, Canadian Solar.

Before buying solar inverters and supplying them in your local area, you need to be aware of all the functionalities of solar inverters, and the different types of inverters available. Thereafter, you can compare solar quotes on our site with various inverter types. Why Inverter for PV Systems?
