It has a helpful “What Can I Bring?

” tool that shows you everything that’s prohibited in checked and carry-on luggage, so you can be sure all your items make it to your final destination. This power bank from Anker is a CNN Underscored favorite. It packs a 10,000mAh capacity and has a USB-A port.

An iPhone can be charged more than 5 times with a 20,000 mAh (milliamp-hour) power bank, but can you take a power bank on plane?

You can bring and take a power bank on a plane, but power banks are only permitted in carry-on or hand luggage, not in checked bags. Batteries up to 100Wh are allowed.

Most standard power banks fall under the FAA’s 100Wh (or 27,000mAh) limit, but higher-capacity models are increasingly common, especially among travelers looking to charge laptops or multiple devices. If your charger exceeds the limit, isn’t clearly labeled with its watt-hour rating, or ends up in.

You can bring a portable charger or power bank on a plane in your carry-on luggage. Spare lithium-ion batteries must also be in carry-on bags, not checked luggage. Power banks rated between 100 watt-hours (Wh) and 160Wh require airline approval. No power bank over 160Wh is allowed. Regarding size.

At its simplest, a power bank is a rechargeable battery, usually lithium-ion, inside a protective case with electronics that manage safe charging. The quality of those electronics and the materials used make the difference between a device that lasts for years and one that fails after a few trips.
