Over 11,281 small-scale systems have been installed in Canberra, ACT with a collective capacity of 10,631 kW. Around one in ten households in Canberra, ACT, generates solar power through rooftop installations, contributing to the territory's goal of reaching and maintaining 100% renewable energy.

By installing a solar energy system at home or in your business, community group or school, you're helping the environment. When you use your solar electricity during the day, you reduce the amount of electricity you may need to buy from the grid. Your daytime use could be free if your solar system.

This goal was reached in 2020 when the Australian Capital Territory (ACT) — home to the nation's half a million-strong capital, Canberra — had enough renewable electricity to make coal and gas obsolete. It was the first state or city with a population above 100,000 to decarbonize its grid outside.

At Solar Choice, we offer an unbiased guide on solar panels and solar installation in Canberra, ACT, because we're independent from installers and manufacturers. This means you get the honest information you need before making any decisions about solar panels or solar batteries. In this guide.

The Australian Capital Territory stands as a beacon of renewable energy innovation, having achieved carbon neutrality ahead of schedule through strategic policy implementation and technological advancement. With Canberra's exceptional solar irradiance levels—averaging 5.2 kWh/m²/day—coupled with.

Canberra exceeds both Melbourne and Sydney in average sun hours and is home

to some of the most ambitious energy targets in Australia. Having started our business in Mitchell, SolarHub is proudly Canberran. As experts in the area, we've installed more than 12,000 solar systems in our city and more.
