

Canberra solar container battery Manufacturing Plant

Overview

Eku Energy will design, build, run, and ultimately own the 250-megawatt battery, which will be located at Williamsdale, south of the Tuggeranong town centre.

Eku Energy will design, build, run, and ultimately own the 250-megawatt battery, which will be located at Williamsdale, south of the Tuggeranong town centre.

The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours during peak demand periods. This stored energy will be used to support our electricity grid. The Big Canberra battery.

The Big Canberra Battery will be one of the largest in Australia -- able to power up to 23,400 homes with their daily energy use, on a single charge. Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by Eku Energy to provide expert planning.

Naturgy has successfully connected its first battery storage facility in the world to the grid, a historical milestone for the company in the renewables business. The ACT Battery project, located in Australia and developed and built by its international generation subsidiary Global Power Generation.

We successfully connected the world's first battery storage facility to the grid, a historic milestone for GPG in the renewables business. The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by enabling.

The Big Canberra Battery will have more capacity than South Australia's 150 megawatt Hornsdale battery. (ABC News: Lincoln Rothall) The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage.

The ACT Government's Development Application to create a grid-scale battery in Williamsdale, Tuggeranong, has been approved. Chief Minister Andrew Barr announced last year that Eku Energy, a global specialist energy storage business, would develop, build, and operate the large-scale battery storage.
