

Cape Town PV and energy storage policy plan

Overview

South Africa, Cape Town: The City of Cape Town has announced a major \$4 B (R71.2 B) investment plan for its energy sector over the next three years, focusing on strengthening power infrastructure, curbing load-shedding, and expanding clean energy.

South Africa, Cape Town: The City of Cape Town has announced a major \$4 B (R71.2 B) investment plan for its energy sector over the next three years, focusing on strengthening power infrastructure, curbing load-shedding, and expanding clean energy.

City to invest in power plant upgrades, solar PV expansion, and LED streetlighting as part of its strategy for a resilient, future-ready energy network. South Africa, Cape Town: The City of Cape Town has announced a major \$4 B (R71.2 B) investment plan for its energy sector over the next three.

esses, and the environment for future generations. Furthermore, the strategy aims to develop energy systems that propel Cape Town's economic growth, achieve enhanced well-being and poverty alleviation for its residents; to be a City of Hope. The strategy provides a pathway to increase capabilities.

self sufficient in energy generation capacity. Image credit: WCLG City of Cape Town mayoral committee member for energy, Beverley van Reenen, has confirmed that from October 2023, all solar PV and/or battery storage applications at the City of Cape Town will be treated as grid-tied system work.

There is growing pressure on South African municipalities to promote energy efficiency, implement sustainable and reliable energy solutions, reduce reliance on Eskom, and navigate the complexities of escalating energy costs and price volatility. Additionally, to avoid the risk of economic.

The City of Cape Town has unveiled a staggering R71.2 billion (approximately \$3.9 billion) investment plan over the next three years, targeting critical infrastructure upgrades and a significant shift towards diversified and sustainable electricity supply. This monumental commitment positions Cape.

an RFP for 100MW battery energy storage?

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage system as per Town's economic development strategy?

The City?

?

?

The Economic Development Strategy cites lower carbon city development as a key economic. How does Cape Town support decarbonisation of electricity?

The City of Cape Town's Energy Strategy THE KEY AREAS OF ALIGNMENT INCLUDE: Decarbonisation of electricity is evidenced through the City of Cape Town's delivery and support of new renewable energy sources (whether owned or procured by the City or from the private sector) to reduce the local grid emissions factor. This is.

How does the city of Cape Town benefit from a multi-year project?

An overview of the City of Cape Town's multi-year project to retrofit municipal infrastructure for energy efficiency. While the CCT has shown the ability to access grants and loans, it prefers to use its own funding supplemented by grants. This is done to reduce the debt burden and the payable interest rates.

Is Cape Town a good place to invest in energy projects?

The City of Cape Town municipality (CCT) is exemplary in this regard as it has managed to consistently secure funding to supplement the municipal fiscus in the form of grants, loans, and concessional finance for energy projects, through institutions like IFC, KfW, AfD, and the national Department of Electricity and Energy (DEE)* to mention a few.

Why should Cape Town invest in a load shedding system?

load-shedding, to alleviate energy poverty, and to optimise energy use across Cape Town. This will be backed by a future-fit municipal electricity service, proactive electricity infrastructure upgrades, and support for residents to
