Gas turbine stations are widely used in China for both small-scale and auxiliary power generation. These systems operate by combusting natural gas or petroleum derivatives to heat compressed air, which then expands rapidly through turbine blades. The spinning turbine drives a generator to produce.

Based on how solar energy is converted and stored, there are several kinds of solar generators in China, each with touted benefits and downsides for various consumers and commercial uses. Small, rechargeable batteries power these portable generators, making them small and light enough to take.

Buy cheap & discount solar power system directly from reliable China wholesalers. Want cheap solar power system?
