

Chile Valparaiso Energy Storage Power Direct Sales Company

Overview

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Will Zelestra develop solar and storage projects in Chile?

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage capacity in Chile. Solar and storage projects are crucial in Chile's decarbonization goals for enhanced security, grid stability, and efficient distribution. Several technological innovations can help develop solar and storage projects in Chile.

How can solar energy and storage improve grid stability in Chile?

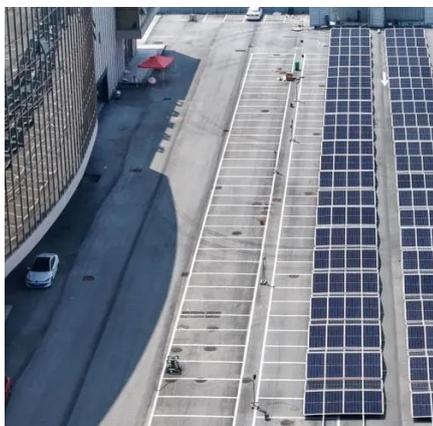

Integrating solar energy and storage technologies is crucial for addressing the intermittency and grid stability in Chile. Key projects include Cerro Dominador, solar and PV hybrid, Zelestra's 220 MW solar and 1 GWh battery project, and AES Andes solar and battery storage hub.

Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.
