

China-Europe solar container communication station inverter Huawei

Overview

Is Huawei still a global inverter company?

Huawei alone accounted for 29% of global shipments in 2022. While it exited the U.S. inverter market in 2019, it continues to supply other countries at scale. Philipp Schroeder, CEO of German solar developer 1Komma5, said his firm avoids Huawei products due to security risks.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

Who makes the most solar inverters in Europe?

In 2023, 78% of all inverters installed in Europe came from Chinese vendors, with the overwhelming majority being made by Huawei and SunGrow, according to DNV, a risk consultancy. The report was commissioned by SolarPower Europe, an industry advocacy group.

What is Europe doing about cybersecurity in the solar value chain?

The European Commission is assessing cybersecurity risks in the solar value chain, with the ESMC advocating for measures like Lithuania's 2023 ban on Chinese inverters. As Europe balances energy security and economic considerations, the proposed toolbox aims to enforce risk assessments and limit remote access by high-risk vendors.
