

Copenhagen Battery Storage

Overview

Who owns beehive battery energy storage system?

NEW YORK and SAN DIEGO (August 15, 2025): Copenhagen Infrastructure Partners (CIP), through its fifth flagship fund, CI V, and EDF power solutions North America today announced that CIP has acquired full ownership of the 1 gigawatt hour (GWh) Beehive Battery Energy Storage System (BESS).

What is a battery storage project?

Our goal is to build an integrated business where technology, power trading, and development work together to create long-term value. Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity.

How do I start a battery storage project?

Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity. Site suitability for both local residents and the municipality is paramount.

How did Copenhagen Energy Invest in Everspring?

Copenhagen Energy reached a final investment decision (FID) on the Everspring portfolio earlier in 2025. In June, it secured financing for the two sites under an agreement with regional bank Ringkjøbing Landbobank. In July, Danish company Energrid was hired as the engineering, procurement, and construction (EPC) contractor for the projects.
