

Corrosion-resistant solar-powered containers for farms

Overview

Sustainable, off-grid refrigerated containers designed to extend the shelf life of perishable goods, reduce waste, and empower businesses and farmers with cost-effective cold storage solutions—anytime, anywhere.

Sustainable, off-grid refrigerated containers designed to extend the shelf life of perishable goods, reduce waste, and empower businesses and farmers with cost-effective cold storage solutions—anytime, anywhere.

Solar-driven agriculture merges solar energy production with farming on the same land. This model uses sunlight to generate electricity while growing crops or raising livestock. It creates dual revenue: farmers sell both clean power and agricultural products. For example, solar shipping containers.

It's why thousands of American farms & ranches trust RPS. Rather a Friendly Voice?

Our famous support team is here to help. It's a QUICK 10 minute phone call! COMPLETE SET UP! RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows.

Sustainable, off-grid refrigerated containers designed to extend the shelf life of perishable goods, reduce waste, and empower businesses and farmers with cost-effective cold storage solutions—anytime, anywhere. Our cold rooms run entirely on solar energy, reducing electricity costs and ensuring.

Hydroponic container farms offer a clean, efficient way to grow food year-round without soil or farmland. Containers come in sizes like 20 ft, 40 ft, and 45 ft—customizable for different crop volumes and growing setups. Add-ons like water recirculation, solar panels, and remote monitoring boost.

Converting shipping containers into portable trailer platforms offers significant advantages for agricultural and rural applications. A key benefit is that these modified containers can often be placed directly on the ground without the need for extensive permitting processes, which are typically.

Container farms are vertical farming systems that use modified shipping containers

for growing food inside without the need for power, water, sunlight or nutrients.
Essentially, the container protects a controlled environment (CEA) that is ideal for growing crops, providing a solution for.
