

Cuban Electricity 5G Base Station Site

Overview

Can Cuba fund new power stations or grid upgrades?

With restricted access to international credit and trade, Cuba cannot easily fund new power stations or grid upgrades. Stopgap measures such as leasing floating power plants or importing small generators provide relief but are costly and unsustainable.

What happened to Cuba's electricity grid?

Sign up [here](#). Cuba's national electrical grid first crashed around midday on Friday after the island's largest power plant shut down, sowing chaos and leaving around 10 million people in the dark. The grid has collapsed three times since, underscoring the precarious state of the country's infrastructure.

Why does Cuba have a power grid crisis?

While the collapse of the electrical grid comes as a surprise, the crisis is years in the making. Cuba's power plants are dilapidated and in desperate need of maintenance. In addition, Cuba produces very little fuel of its own, meaning it relies on imports to keep the electrical grid afloat.

Why did electricity go out in Cuba?

The electricity went out nationwide Friday morning after a failure at a thermoelectric power plant in Matanzas, east of Havana, Cuba's Energy Ministry said on X.
