

# Does the mopping machine base station need a power supply

## Overview

---

Place the base station against a wall and near an outlet, making sure there is more than 1m/40inches of clear space in front of the base station. After placing the base station, insert the power cord into the base station, then insert the plug into the outlet.

Place the base station against a wall and near an outlet, making sure there is more than 1m/40inches of clear space in front of the base station. After placing the base station, insert the power cord into the base station, then insert the plug into the outlet.

Where should I position a Narwal Freo?

Place the base station against a wall and near an outlet, making sure there is more than 1m/40inches of clear space in front of the base station. After placing the base station, insert the power cord into the base station, then insert the plug into the outlet.

Press any button on the robot to pause while the robot is cleaning or returning to charge. Note: The VersaLift sensor will be lowered when the robot is in standby mode, charging on the base station, or cleaning low-clearance areas. In the case of cleaning low-clearance areas, do not move the robot.

Robotic home cleaning devices require regular charging, and their docking stations or charging pads must be placed near accessible electrical outlets. Installing these outlets in strategic locations helps streamline the operation of your devices and reduces the need for long cords or awkward.

All robot mowers need a permanent power source (all except the Ambrogio L60 Elite & Elite S+). They normally come with a transformer to plug into a 13A mains socket and a low voltage (normally around 20v) to connect the transformer to the base station. We would recommend putting the transformer.

Q: How to turn off a robot or base station?

A: 1. Under normal circumstances, the base station will not actively shut down, but will automatically turn off the screen and enter low-power mode. 2. If you need

the base station to completely shut down, please unplug the power cord of the base station.

and hold the button of robot for three seconds to turn it on. Wait for the power indicator to remain on, and place the robot against the base station as shown in the figure for charge the base station, and the robot will automatically turn on. After power on, the robot will automatically pair with.
