

# Dominican green energy storage solar container lithium battery

## Overview

---

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new renewable energy generation. Marking a national first, the bidding process mandates the inclusion of battery energy.

Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by 2027 during a speech at a Caribbean energy forum. Santos said a renewable energy tender this year, involving the National Energy Commission (CNE), would be.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project.

The project will be paired with a 15MW/60MWh battery energy storage system. Image: Dominican Republic Presidency. Spanish renewables developer Ecoener has received a definitive concession from the Dominican Republic Government to build a 60MWp solar PV project in the country. Located in the.

During the “Energy Sector Reform” Forum organized by the Dominican Association of the Electric Industry (ADIE) and the Technological Institute of Santo Domingo (INTEC), Edward Veras, executive director of the National Energy Commission (CNE), emphasized the Dominican Republic’s progress in energy.

The Dominican Republic is taking significant strides in its energy transition, with a strong emphasis on renewable energy and energy storage. This focus is central to the latest Dominican Republic energy news as the nation pursues a more

sustainable future. Guided by an ambitious goal to reach 300.
