

EU Energy Storage Power

Overview

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024.

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024.

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024. The report also projects.

Since 2020, the Commission publishes yearly progress reports on the competitiveness of clean energy technologies that present the current and projected state of play for different clean and low-carbon energy technologies and solutions. The 2025 report highlighted the urgent need to quickly deploy.

MUNICH, Germany (Wednesday 7th May 2025): New analysis reveals another year of record installations for European* battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery Storage. 15% growth. Battery storage forecast. Drivers for battery.

Pumped hydro is the most widely used technology for energy storage in Europe and worldwide, but batteries and hydrogen have come into the spotlight over the last decade as a recent trend in the energy storage market. However, despite an exponential growth in Europe's battery energy storage.

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW. According to the ninth annual edition of the European Market Monitor on Energy Storage (EMMES) from trade association European Association for Storage.

ESS

Europe accelerates renewable energy growth: 89 GW of energy storage

As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a critical enabler of renewable energy expansion. The report ...

[Europe installed 12GW of energy storage in 2024](#)

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, LCP Delta has said.

New report: European battery storage grows 15% in 2024, EU energy

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking installations, and bringing ...

Energy storage

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when ...

European Market Outlook for Battery EU solar Storage 2025 ...

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

Energy storage

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - ...

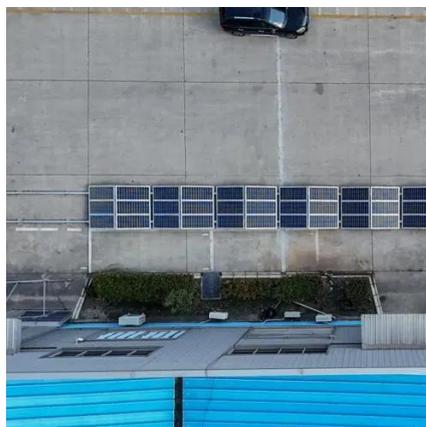

[New EU Tool Tracks Real-Time Energy Storage Across Europe](#)

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

Europe accelerates renewable energy growth: 89 GW of energy ...

As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a critical enabler of renewable energy expansion. The report ...

[New report: European battery storage grows 15% in 2024, EU ...](#)

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking installations, and bringing ...

SolarPower Europe Report: European Battery Storage Expands ...

A new analysis from the latest European Market Outlook for Battery Storage shows that Europe experienced another record-breaking year for battery storage installations, even ...

European energy storage: a new multi-billion-dollar asset class

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. That's creating a unique new ...
