Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems. Integrating storage in the electric grid, especially in areas with high energy demand, will.

QUEENS, NY —Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the advancement of a key commitment in New York City's Green Economy Action Plan to develop a clean and renewable energy system. NYCIDA closed its.

Approval has been granted for construction of a large-scale battery energy storage system (BESS) at the site of an existing fossil fuel power plant in New York. Last week, New York State Public Service Commission approved an application for a Certificate of Public Convenience and Necessity, filed.

The American Public Power Association is the voice of not-for-profit, community-owned utilities that power 2,000 towns and cities nationwide. We represent public power before the federal government to protect the interests of the more than 49 million people that public power utilities serve, and.

ALBANY — The New York State Public Service Commission (Commission) today confirmed granting the construction and operation of a battery-based energy storage facility with a capacity of up to 100 megawatts (MW) located in Astoria, Queens. The \$132 million facility will be built by East River ESS.

Energy storage is a smart and reliable technology that helps modernize New York's

electric grid, helping to make the grid more flexible, efficient, and resilient. With thousands of energy storage sites already in place across the State, this exciting technology is playing an important role in.
