

Estonia Energy Storage Implementation Plan

Overview

EIC provided EUR 5.2 million in funding for ten pilot energy storage projects. Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia each received a grant to begin implementing renewable energy storage device projects across Estonia.

EIC provided EUR 5.2 million in funding for ten pilot energy storage projects. Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia each received a grant to begin implementing renewable energy storage device projects across Estonia.

On 27 January, the Estonian government coalition announced plans to hold auctions for offshore and onshore wind parks, each with a capacity of 2 TWh. These auctions, set to be launched in April, are part of broader efforts to transition to renewable energy and enhance the country's energy security.

The Estonian Energy Sector Development Plan aims to ensure that energy supply remains affordable and accessible to consumers, that environmental impacts are acceptable and that it aligns with the long-term energy and climate policies of the European Union. In addition, energy sector development.

Estonia's National Energy and Climate Plan (NECP) to the year 2030 Update

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates. Operational since Q4 2024, this 240 MWh lithium-ion system supports Estonia's ambitious plan to derive 50% of its electricity from wind.

umped-hydro storage plant will begin in 2025. During the nominal operating cycle

of 12 hours, Zero Terrain Paldiski generates 6GWh of power to d the main building permits in December 2022. Construction of the country''s first umped-hydro storage plant will begin in 2025. During the nominal.
