

Estonia Energy Storage Power Station Development Cooperation Project

Overview

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support.

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support.

On 27 January, the Estonian government coalition announced plans to hold auctions for offshore and onshore wind parks, each with a capacity of 2 TWh. These auctions, set to be launched in April, are part of broader efforts to transition to renewable energy and enhance the country's energy security.

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru.

Evecon, Corsica Sole and Mirova will build the largest battery park in continental Europe, located in Kiisa, Estonia. Rendering by Evecon. Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids.

Baltic Storage Platform (BSP) has officially secured €85.6 million in landmark funding for its battery projects in Estonia, marking a pivotal step in the region's green energy transition. This substantial investment is set to accelerate the development and construction of large-scale battery energy.

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia. The JV between Estonian energy company Evecon, French solar PV developer Corsica Sole, and asset manager Mirova will develop the 2-hour duration systems, with.

Construction has begun in Estonia on two energy storage facilities with a total

capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took place for the project, which aims to support the region's energy stability and accelerate the transition to renewable energy sources.
