What are the different types of power inverters?

Power inverters produce one of two different types of wave output: Modified Sine Wave Pure Sine Wave Modified sine wave inverters deliver power that is consistent and efficient enough to run most devices adequately. These types of inverters are the most popular and affordable. They are also small and highly efficient.

How much power does an inverter need?

*** Peak Power vs Typical or Average An inverter needs to supply two needs - Peak, or surge power, and the typical or usual power. Surge is the maximum power that the inverter can supply, usually for only a short time - a few seconds up to 15 minutes or so.

What is a true sine wave inverter?

True sine wave inverters are the most expensive, but they also deliver the most consistent, highest quality wave output. Some sensitive equipment requires a true sine wave, like tool battery chargers, professional audio/video equipment, certain medical devices and variable speed tools.
