These inverters convert the direct current (DC) generated by solar panels into alternating current (AC) for the electrical grid. They feed excess energy generated by solar systems back into the grid. This helps users earn credits or lower their electricity bills. Key features include:.

Steca Coolcept Grid Inverter 4200- The high efficiency results in a peak efficiency of 98.6 % and a european efficiency of up to 98.3 %, which results in less lost power that must be dissipated into the environment. This improves your yields. In addition to this, a new and unique cooling concept.
