How many 4G base stations are there in China?

Back in December last year, Global Times reported, there are currently approximately 6 million 4G base stations worldwide, more than half of which are in China and about 300,000 in the US. Why does China have so many base stations?

This is because of a nation-level project in China in 2003.

Can you measure a base station if you're in a 3G network?

You can only measure stations in the network you are actively connected to, so for instance you can't locate a 4G base station if you are in a 3G network. Usually 2G/3G/4G/4G+ cells can all be in the same base station, and even be sent from the same panel antenna.
