Benin's upcoming 2025 grid-scale battery storage project isn't just another infrastructure initiative - it's sort of a litmus test for renewable energy adoption across developing nations. With 43% of Benin's population still lacking reliable electricity access [1], this \$300 million initiative aims.

What is the energy sector in Benin like?

The energy sector in Benin is primarily reliant on biomass and imported petroleum products, with two percent of net energy consumption coming from electricity. The page below gives an overview of the energy sector in Benin and explains Power Africa's involvement in the country.

Where does Benin get most of its electricity from?

Benin primarily imports electricity from Nigeria and other neighboring countries. Based on 2013 data, Benin's national electrification rate reached 29% (9% in rural areas, 57% in urban areas). Limited and unreliable power is still one of Benin's major problems in the electricity sector.

How much energy does Benin use?

Benin's total energy consumption in 2009 was 3,475 ktoe (World Bank, 2009). The per capita energy consumption in the same year was 0.404 toe. This is about half of the average per capita energy consumption for Sub-Saharan African countries, and less than a quarter of the world average (World Bank, 2009).
