

# How many hydrogen energy stations are there in China

## Overview

---

By 2024, a cumulative total of 540 hydrogen refueling stations had been built in China, with 134 new stations constructed, representing a cumulative year-on-year (YoY) increase of 33%.

By 2024, a cumulative total of 540 hydrogen refueling stations had been built in China, with 134 new stations constructed, representing a cumulative year-on-year (YoY) increase of 33%.

A total of 540 hydrogen refueling stations were built in China by 2024 Supported by the central government! A total of 540 hydrogen refueling stations were built in China by 2024 Recently, the National Energy Research Institute released the China Energy Data Report (2025). According to the report.

This Excel-based database contains a complete list of hydrogen stations deployed globally and describes many of their attributes. The database contains the location of the stations, their opening date, the fueling pressure, the daily fueling capacity, the storage capacity, and the vehicle types.

By then a network of at least 1000 is planned service stations During the "14th Five-Year Plan" period, 1,000 hydrogen refueling stations will be planned. Sinopec, the national service station operator, aims to build 1,000 hydrogen refueling stations to become the first hydrogen supplier for the.

The number of planned large-scale renewable hydrogen projects is growing quickly,' NEA top official Xu Jilin said on Monday China accounted for more than a third of global hydrogen output last year, making it possibly the biggest producer as the country reached a critical point to push for.

(Yicai) July 4 -- About 40 percent of the world's hydrogen refueling stations were in China as of the end of last month, as the country accelerated its hydrogen energy infrastructure development, according to industry data. China added 19 new hydrogen refueling stations in the first half of the.

In his greetings, he revealed that more than 400 hydrogen stations have already been completed in China, the largest number in the world, and 280 have started operations. According to Mr. Chiang, China already has more than 13,000 fuel cell

vehicles (FCVs), ranking third in the world. Of these, the.

## How many hydrogen energy stations are there in China

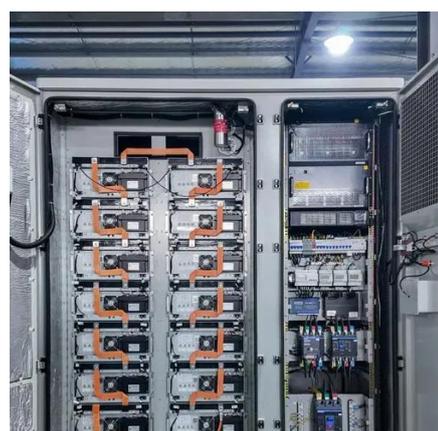

### [China: number of hydrogen fuel stations 2023, Statista](#)

In the first half of 2023, there were \*\*\* hydrogen fuel stations in China.

### [Hydrogen Station Database 1Q 2025: China Leads with the](#)

According to the database, the highest number of hydrogen stations have been built in China, followed by Japan.

### [China added 33 hydrogen refueling stations this year](#)

China has added 33 hydrogen refueling stations by August this year, raising the total number to 466, according to latest industry survey conducted by a leading domestic consultancy.

## 'China is the world leader in hydrogen refuelling stations, but it is

China has built more hydrogen refuelling stations than any other country, with 354 already

operational at the end of 2023, according to Interact Analysis. But despite this, the UK ...

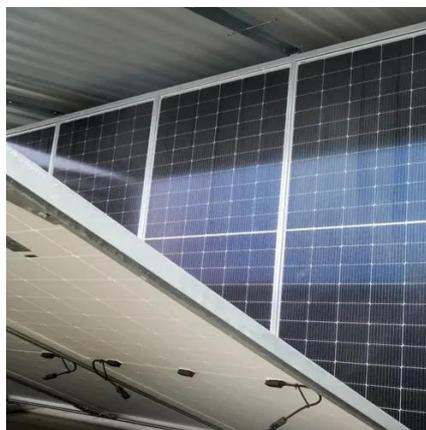

### [China added 33 hydrogen refueling stations this year](#)

China has added 33 hydrogen refueling stations by August this year, raising the total number to 466, according to latest industry survey ...

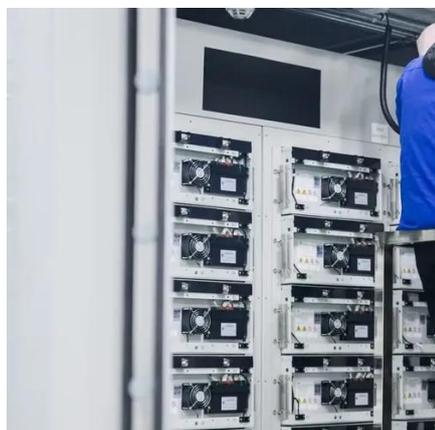

### **Supported by the central government! A total of 540 hydrogen ...**

By 2024, a cumulative total of 540 hydrogen refueling stations had been built in China, with 134 new stations constructed, representing a cumulative year-on-year (YoY) ...

### [China Has 40% of World's Hydrogen Refueling Stations](#)

(Yicai) July 4 -- About 40 percent of the world's hydrogen refueling stations were in China as of the end of last month, as the country accelerated its hydrogen energy infrastructure ...

## [Hydrogen Stations in China. Map and List](#)

During the "14th Five-Year Plan" period, 1,000 hydrogen refueling stations will be planned. Sinopec, the national service station operator, aims to build 1,000 hydrogen refueling stations ...

## [China Has Over 400 Hydrogen Stations, the Most in the World](#)

In his greetings, he revealed that more than 400 hydrogen stations have already been completed in China, the largest number in the world, and 280 have started operations. ...

## **China plans to build more than 1,200 hydrogen refueling stations ...**

China's boom in the promotion of hydrogen fuel cell vehicles is generating increasing demand for hydrogen refueling stations (HRS), which has resulted in them being included in government ...

## **China leads global hydrogen production amid clean energy race**

There were more than 540 hydrogen refuelling stations nationwide at the end of last year, the NEA said, while the number of hydrogen fuel-cell vehicles on the road stood at ...
