

How much does a 5G base station cost in South Africa

Overview

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

Does South Africa have a 5G market?

The South African 5G market has entered “a dynamic growth phase,” with major telecommunications operators, including MTN and Vodacom, spearheading the rapid expansion of 5G coverage across the country. By the end of 2024, over 50% of the population had access to 5G networks, according to a report by ICT market research firm Africa Analysis.

How much does SA 5G cost?

However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag—between \$1 billion and \$3 billion per operator. Unlike NSA 5G, which relies on existing 4G infrastructure, SA 5G requires a brand-new core network. This includes cloud-based architecture, advanced data centers, and software-defined networking.

Which companies are deploying 5G in South Africa?

Major telecom operators like Vodacom, MTN, and Rain have been rolling out 5G services across various cities. As to SA 5G networks, the deployment is still in the early stages. Most of the current 5G networks in South Africa are non-standalone (NSA), which means they rely on existing 4G infrastructure for certain functions.
