As of 2026, the average cost of solar panels in Georgia is \$3.06 per watt, making a typical 7.2 kilowatt (kW) solar system \$3.06 after claiming the 30% federal solar tax credit now available. This is just about the average price of residential solar power systems across the United States, which is.

For homeowners in Georgia, the average cost for a professionally installed residential rooftop solar system typically ranges from \$14,000 to \$26,000 before any tax credits or incentives are applied. This guide will provide a comprehensive breakdown of what that investment includes, the key factors.

How much is it to go solar in the Peach State?

Switch to solar with a system built for you. Average solar panel installation costs range from \$8,875 to \$25,357 in Georgia. How much you actually spend depends on the size of your system, what incentives you're eligible for and other factors. Based on.

With electricity prices climbing 18% since 2020 and continued upward pressure on utility rates, homeowners across Georgia are exploring how solar panels for home use can provide long-term energy cost stability and protection from future rate increases. This guide covers everything you need to know.

You'll spend an average of \$12,635 on a 5 kW system in Georgia, after tax incentives. For Georgia, you can use \$3.52 per watt to determine the price of a larger system (system size x price per watt x 0.7 to account for tax incentives).
High Power Bills?

How long does it take to see a return on your. How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Can solar panels withstand hail in Georgia?

Solar panels are made from tempered glass, and many manufacturers test the panels to withstand hail that falls at 50 miles per hour. Areas in Georgia that are prone to hailstorms may consider a solar panel cover to offer extra protection. HomeAdvisor's Guide to the Cost of Solar Panels in Georgia explores solar panel cost by type and location.

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.
