

# How much is the tariff on energy storage batteries in Chile

## Overview

---

As of 2023, Chile applies a 6% import tariff on most energy storage systems under HS code 8507.60.00. However, there's more you need to consider: 1. Battery Chemistry Matters Lithium-ion batteries face different regulations compared to flow batteries.

As of 2023, Chile applies a 6% import tariff on most energy storage systems under HS code 8507.60.00. However, there's more you need to consider: 1. Battery Chemistry Matters Lithium-ion batteries face different regulations compared to flow batteries.

Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for.

This article provides a detailed breakdown of the import cost structure based on its FOB price of \$180 from Shenzhen, China, including tariffs, VAT, logistics, and additional operational costs, along with strategies to optimize expenses. Applications: Energy storage systems (ESS), RVs, boats.

Are you planning to import energy storage batteries to Chile?

Knowing the tariff structure and recent policy changes can save you thousands. This guide breaks down Chile's current import duties, tax exemptions, and strategies to optimize your supply chain costs. As of 2023, Chile applies a 6%.

All Chilean energy storage players, ranging from IPPs to PCS providers, are now closely awaiting the publication of the capacity market decree (DS N 62) expected in Q2 of 2024. This decree is expected to provide capacity payments based on the duration of storage projects as seen in the table below.

Between 2023 and 2030, 5.9 GW and 24.7 GWh of energy storage is forecast to be installed: • Chile's administration considers storage strategic for the country's goals (at least 60% of renewables by 2030, 100% by 2050). It proposed a law to allow the tender of 2 GW of BESS at a \$2 billion cost.

This risk has proven particularly tricky to size and mitigate in Chile because, under the DistCo PPAs, the cost to purchase energy at the nodes at which the energy is required to be physically delivered by the project to the offtakers at a large number of locations across the country can prove to. How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could increase the scope for bond financing.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How can Chile keep up with the changing energy demand landscape?

Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO<sub>2</sub>. In March 2024, BESS Coya, the largest battery-based energy storage system in Latin America, started operations.

Can co-located batteries help solar plants capture better power prices?

Co-located batteries, like Engie S.A.'s BESS Coya, will help solar plants capture better power prices by charging the batteries during solar hours when power prices are very low and dispatching energy during peak hours when prices are close to USD 100/MWh.

## How much is the tariff on energy storage batteries in Chile

### Chile GES2024

About 15 standalone energy storage projects involving investments of around \$1.93 billion are submitted for environmental assessment in Chile, and all ...

### [How much is the import tariff on energy storage components?](#)

Energy storage components are subjected to varying import tariffs that depend on several factors, including the specific type of component, the country of origin, and applicable ...

### Chile Battery Import Cost Breakdown: LiFePO4 12V 100Ah Example

This article provides a detailed breakdown of the import cost structure based on its FOB price of \$180 from Shenzhen, China, including tariffs, VAT, logistics, and additional ...

### [Battery Energy Storage Systems \(BESS\) in Chile](#)

In fact, batteries charged at nearly \$0/MWh during the day ...

### Chile Energy Storage Industry Holds Promise , EMIS

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity ...

### **Banking on batteries in Chile**

Analyst BloombergNEF's annual battery price survey, published in November 2023, recorded a 14% drop in costs from 2022 to 2023, to a record low of \$139/kWh. Then ...

### How much is the import tariff on energy storage ...

Energy storage components are subjected to varying import tariffs that depend on several factors, including the specific type of ...

## Understanding Chile's Tariff on Energy Storage Batteries Key ...

Current Tariff Structure for Energy Storage Batteries in Chile As of 2023, Chile applies a 6% import tariff on most energy storage systems under HS code 8507.60.00.

## Chilean Battery Energy Storage Systems Stabilize Energy ...

Co-located batteries, like Engie S.A.'s BESS Coya, will help solar plants capture better power prices by charging the batteries during solar hours when power prices are very ...

## Chile GES2024

About 15 standalone energy storage projects involving investments of around \$1.93 billion are submitted for environmental assessment in Chile, and all are battery-based (Bnamericas, 2023).

## Battery Energy Storage Systems (BESS) in Chile

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh.

## Chile advances regulation to support ambitious storage goals

Between 2023 and 2030, 5.9 GW and 24.7 GWh of energy storage is forecast to be installed: o Chile's administration considers storage strategic for the country's goals (at least 60% of ...

## Gigawatts of BESS Opportunities in Chile: Key Risk ...

Battery storage projects cannot come soon enough for Chile. While Chile has been at the forefront of renewable energy generation growth in Latin America for close to a ...
