

Huawei grid-connected 35KW inverter

Overview

What is Huawei on-grid solar inverter?

The Huawei On-Grid Solar Inverter series is engineered to meet the requirements of commercial grid systems. They are equipped with advanced grid compatibility features, ensuring that your solar installation operates harmoniously with the commercial grid.

What is a Huawei solar inverter?

Huawei's On-Grid Solar Inverter series, in the 30kW to 40kW range, is designed to maximize energy yield. These inverters are engineered to convert a substantial portion of the sunlight captured by solar panels into usable electricity.

Are Huawei inverters battery-ready?

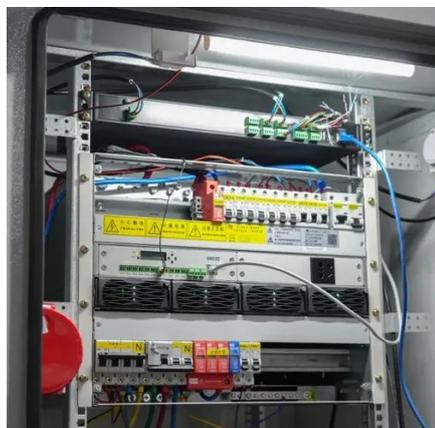

Yes, all Huawei residential inverters (SUN2000-L1 and M1 series) are battery-ready and support plug-and-play integration with LUNA2000 battery systems. You can add batteries years after the initial installation without requiring additional hardware or inverter replacement.

Are Huawei solar inverters reliable?

Huawei solar inverters are highly reliable, backed by the company's position as the world's #1 inverter manufacturer for six consecutive years. The inverters undergo extensive testing including lightning strikes, extreme temperature cycling, and submersion tests.
