

India Emergency Energy Storage Power Supply

Overview

The Minister of State for Power, Shri Shripad Yesso Naik, submitted a written report in the Lok Sabha stated that to tackle renewable energy intermittency and maintain grid stability, the Government of India has implemented a range of policy, regulatory, demand-side, and supply-side.

Engineering are focused on Battery + ESS (BESS). In contrast, Greenko is solely concentrated on Pumped Hydro Storage (PHS), while JSW Energy has EMS (Standalone ESS) emerging as a key enabler. As the country rapidly scales up variable renewable energy (VRE), Standalone ESS offers a dispatchable.

India's rapid renewable energy expansion without adequate storage systems has led to growing electricity grid instability, with power shortages expected to rise in May and June. This issue is worsened by a decade-old policy to scale down thermal power expansion, reducing critical baseload support.

NLR's energy storage readiness assessment for policymakers and regulators, summarized on this page, identifies areas of focus for developing a suite of policies, programs, and regulations to enable storage deployment in India. India's electric power system is evolving. The combined changes in the.
