

Italy will subsidize electricity prices for 5G base stations

Overview

How much will Italy's energy policy cost a family?

Italy will unveil a set of measures on Friday worth roughly 3 billion euros (\$3.14 billion) to help families and firms cope with high energy costs, Deputy Prime Minister Matteo Salvini said.

How will rising energy prices affect Italian companies?

Rising prices on the international market will only exacerbate the economic difficulties of Italian companies. According to a report by CGIA, a network of small enterprises, energy costs for industrial production will rise by 19.2 percent – equivalent to 13.7 billion euros – in 2025 when compared to 2024.

How does Italy's electricity market work?

Zonal Market Dynamics: Italy's electricity market is a zonal market, with seven geographic zones affecting short-term price volatility and influencing BESS investment strategies. MACSE Subsidy Scheme: The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue.

Why are energy prices so expensive in Italy?

Energy prices are becoming increasingly expensive for Italian businesses and households due to delays in the development of renewables and increases in the cost of gas on international markets.
