

Japan Chemical Park Energy Storage Project Construction

Overview

NEW YORK & TOKYO – April 29, 2025 – The energy storage platform jointly established by Stonepeak and CHC (the “Platform”) today announced that it has secured 20-year fixed revenue capacity market contracts for five battery energy storage system (“BESS”) projects totaling 348MW of.

NEW YORK & TOKYO – April 29, 2025 – The energy storage platform jointly established by Stonepeak and CHC (the “Platform”) today announced that it has secured 20-year fixed revenue capacity market contracts for five battery energy storage system (“BESS”) projects totaling 348MW of.

Five 20-year fixed revenue capacity market contracts secured through Japanese government’s second Long-term Decarbonization Auction NEW YORK & TOKYO – April 29, 2025 – The energy storage platform jointly established by Stonepeak and CHC (the “Platform”) today announced that it has secured 20-year.

Stonepeak and CHC’s energy storage platform will develop five new battery storage projects in Japan. These projects have a combined capacity of 348 megawatts (MW). The deals were finalized under Japan’s Long-term Decarbonization Auction. These projects were selected as part of Japan’s latest.

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in.

The BESS projects, which total 348 megawatts (MW) of gross capacity, were awarded during the latest round of Japan’s long-term decarbonization auction.
