

# Kazakhstan Photovoltaic Energy Storage Container Three-Phase Procurement Contract

## Overview

---

This report on “Corporate Power Purchase Agreements | Kazakhstan” was developed by the international consultancy HEAT - Habitat, Energy Application & Technology in the framework of the regional project “Capacity Development for Climate Policy in the Countries of.

This report on “Corporate Power Purchase Agreements | Kazakhstan” was developed by the international consultancy HEAT - Habitat, Energy Application & Technology in the framework of the regional project “Capacity Development for Climate Policy in the Countries of.

According to the Embassy of Kazakhstan in China, on December 15 local time, the Sauran 300 MW photovoltaic power generation project in Kazakhstan officially commenced construction. The project is currently the largest single-capacity photovoltaic power generation project in Kazakhstan and the.

The core legal framework governing procurement includes the Public Procurement Law, enforcing transparency standards primarily through the official e-procurement portal [goszakup.gov.kz](http://goszakup.gov.kz). This platform centralizes 99% of state procurement activities, emphasizing competitive bidding, transparent.

This report on “Corporate Power Purchase Agreements | Kazakhstan” was developed by the international consultancy HEAT - Habitat, Energy Application & Technology in the framework of the regional project “Capacity Development for Climate Policy in the Countries of Southeastern and Eastern Europe.

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further.

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market.

Kazakhstan has remarkable solar potential with a very well-designed auction

system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further. Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

Can solar power drive Kazakhstan's decarbonisation?

The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources. This report builds on the first edition of solar investment opportunities in Kazakhstan.

How can a company bid for a contract in Kazakhstan?

Companies wishing to bid for contracts must fulfill several obligatory registration requirements: Registration on [goszakup.gov.kz](http://goszakup.gov.kz): Businesses must create verified accounts on Kazakhstan's official procurement portal by submitting corporate documentation such as incorporation certificates and tax clearance confirmations.

What's new in Kazakhstan?

This update contains the latest economic and political advancements in the country, including the announcement of Kazakhstan's new decarbonisation target for 2060, and the recent Memorandum of Understanding signed between the EU and Kazakhstan, stepping up cooperation on renewables, green hydrogen, and battery value chains.
