

Lithuanian wholly-owned energy storage equipment

Overview

E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity.

E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity.

Utility Ignitis Group has taken a final investment decision (FID) on three large-scale battery storage projects in Lithuania. The company said yesterday (1 July) that it will begin construction on the battery energy storage system (BESS) facilities, which have a combined output of 291MW and storage.

Lithuania's Ministries of Energy and Environment have approved an additional €37 million to expand capital expenditure support for energy storage projects. This funding supplements an existing €102 million fund managed by the Environmental Project Management Agency (EPMA) during its first call.

Additional funding has been approved by the Ministry of Energy and Environment to support its ongoing energy storage procurement program, following overwhelming interest from potential beneficiaries. Meanwhile, Trina Storage has secured the first 180 MWh of battery storage projects in the country.

E-energija Group has started building Lithuania's largest battery energy storage system (BESS), known as the Vilnius BESS, with a capacity of 120MWh. Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total.

Lithuania is rapidly emerging as a frontrunner in Central and Eastern Europe for battery energy storage deployment, with a string of large-scale projects designed to stabilise the grid and enable greater penetration of renewables. As the country moves away from reliance on Russian energy and.

Energy Cells Lithuania (an EPSO-G company), is deploying a 200 MW/200 MWh

portfolio of energy storage projects to ensure effective active power reserve for reliable and stable operation of Lithuania's electricity transmission system. The critical infrastructure investment includes blocks of 50.
