

# Low-voltage solar containerized substation for Georgetown power grid distribution

## Overview

---

Brunstock's step up transformer substations are designed to convert power on solar farms from LV to MV. Our modular pad mounted (metal-clad) substations convert low-voltage AC power generated by the PV inverter into medium-voltage AC power and feed it into the power grid.

We employ Schweitzer Relays for remote monitoring, enabling real-time detection of the operational status of low voltage cabinets, transformers, and ring network cabinets. Additionally, our system supports remote control of the entire circuit breaker within low voltage cabinets and ring network.

Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations. Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested.

Zetwerk, a trusted manufacturing partner serving North America, provides fully engineered containerized substations that meet ANSI, IEEE, and IEC standards—ensuring durability, scalability, and seamless integration into existing grid networks. Know About Fast-deploy Containerized Electrical.

Containerized Packaged Substation delivers a robust, versatile, and efficient power distribution solution designed for diverse environments—whether onshore or offshore. With compact integration, flexibility, and low maintenance requirements, it's ideal for fast deployment in both indoor and outdoor.

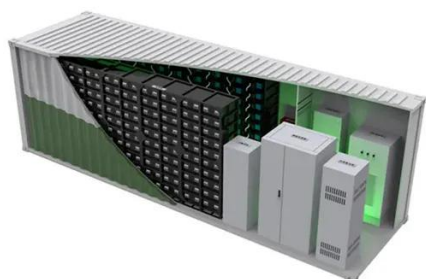

Containerized substation facilities are pre-assembled mobile substations installed

within standard containers, making them a portable, cost-effective, and rapid power distribution solution. These prefabricated units allow for quick installation with minimal on-site work, making them ideal for.
