

Main battery bms1

Overview

The HVX.bms1 is the central control unit of the battery system. It includes three processors for highest levels of reliability and safety.

The HVX.bms1 is the central control unit of the battery system. It includes three processors for highest levels of reliability and safety.

The HVX.bms1 is the central control unit of the battery system. It includes three processors for highest levels of reliability and safety. It collects all information from the sensor modules, from the Cell Sensor Circuits (HVX.csc4) and from the Power Measurement Board (HVX.pmb), calculates the.

Talk to one of our experts. The STW.bms (Battery Main Supervisor) is the central control unit of the battery system. It is connected with the CAN vehicle architecture and ensures the safety of the entire battery system. Over and above this, the BMS provides the required condition determination and.
