

Malabo Solar PV Tile Supplier

Overview

What is solar tile?

Solar tile, which combines solar panels and roof tiles, integrates photovoltaic and architecture. Crystal silicon photovoltaic technology and building tile structure are innovated to eliminate the complex project of secondary installation and replace traditional cement tiles and clay tiles with one-time paving.

What are solar roof tiles?

Like solar panels, solar roof tiles are designed to capture the energy from the sun that is shining on your roof and turn that energy into a usable power source for your home.

What is our solar materials portfolio?

Our solar materials portfolio features a range of raw materials, electronic components and finished products for the solar and energy storage sectors. Supported by allocation agreements with several major PV manufacturers, we're well positioned to manage long-term material supply programs for our customers.
