

Moscow accelerates the promotion of new energy storage

Overview

PJSC Inter RAO at the Kashirskaya GRES power plant and Gazprom Energoholding LLC at the TPP-25 and TPP-26 plants in Moscow will implement projects to build new power units with a total capacity of 950 MW.

PJSC Inter RAO at the Kashirskaya GRES power plant and Gazprom Energoholding LLC at the TPP-25 and TPP-26 plants in Moscow will implement projects to build new power units with a total capacity of 950 MW.

Dec 27 (Interfax) - The government commission on electricity has approved the plan for the prospective development of Moscow's energy system for 2025-2030, the government said in a statement on Friday. PJSC Inter RAO at the Kashirskaya GRES power plant and Gazprom Energoholding LLC at the TPP-25.

China and Russia on Wednesday agreed to deepen cooperation on renewable energy, hydrogen energy, energy storage and carbon markets as they seek to expand into new areas of energy cooperation to boost the energy transition. In a joint communique issued following a meeting between Chinese Premier Li.

On April 12, 2025, Mikhail Mishustin, Prime Minister of the Government of the Russian Federation signed an order approving the Energy Strategy of the Russian Federation until 2050. The strategy defines long-term guidelines for the development of the fuel and energy complex in the context of the.

Moscow and Beijing have staged a communication and diplomatic coup that could firmly anchor Russian gas flows eastward. If materialized, the Power of Siberia 2 (PoS-2) gas pipeline project would reassert the strategic weight of Russian resources after the 2022 invasion of Ukraine, even as the.

Global demand for primary energy is expected to climb 22% by the year 2050, with electricity consumption set to nearly double. Meanwhile, the likelihood of local shortages of critical materials (such as lithium, copper, nickel, and rare earth metals), the need for substantial investment, and, most.

Imagine a fleet of energy storage trucks arriving at a Moscow construction site like pizza delivery vans, but instead of pepperoni, they're serving megawatt-hours. These mobile energy storage vehicles (MESVs) are rewriting the rules of urban

power management in Russia's capital, where temperatures.
