What is the 'new' keyword in JavaScript?

The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What ...

Difference between 'new operator' and 'operator new'?

A new expression is the whole phrase that begins with new. So what do you call just the "new" part of it? If it's wrong to call that the new operator, then we should not call ...

html

0 The target attribute of a link forces the browser to open the destination page in a new browser window. Using _blank as a target value will spawn a new window every time ...

url

I was searching on this link before finding this answer. I did not find the solution in the link because I was looking for "newline" or "new line" instead of "line feed".

[When to use "new" and when not to, in C++?](#)

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

CSS

This is to show new line and return carriage in HTML. Then you don't need to do it explicitly. You can do it in CSS by setting the white-space attribute pre-line value.
