Who is US solar supplier?

Energy Essentials, All in One Place. At US Solar Supplier, we pride ourselves on delivering top-quality products and exceptional service to solar professionals and homeowners alike. Here's what our customers have to say about their experiences with us. US Solar Supplier supplied our new set of BSM370M-60HPH.

What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

How much power does a solar inverter use?

The power of such an inverter can reach up to 8000 Watts. To determine the size of the required inverter, you need to calculate the total load of all devices in the power supply grid. To do this, measure the power of each device for 1 hour and summarize the obtained result. Hybrid inverters are most effective for solar systems.
