Is your portable power station refusing to charge?

The answer isn't always simple—but the fix might be easier than you think. Portable power stations are lifelines for camping, emergencies, and remote work, yet charging failures can leave you stranded. Many assume a dead unit means costly repairs.

I'm running into an issue with very slow charging of the 500Ah of LFP batteries in my travel trailer, and I have hunch of where the problem may lie. On the DC side of my travel trailer, I have 2 x 250Ah 12v Chins self-heating/ Bluetooth LFP packs wired with a couple feet of 4 AWG pure copper cable.

Fast charging simply means your power station fills up quicker than usual. It does this by accepting a higher amount of power at once, measured in watts. The more watts it can safely handle, the less time it takes to charge. Here's a simple comparison of how charging speed changes depending on the.
