

Palestine Communications begins building 5g base stations

Overview

The communications landscape in the Palestinian West Bank and Gaza Strip is hindered by several challenges, including restrictions from the Oslo Accords, which limit the use of spectrum frequencies for wireless communication without Israeli approval. Overview (consisting of the and the) has access to , , , and services;

- : +970 or +972 The Palestinian telecommunications sector comprises a mix of public and private companies that provide fixed-line, mobile, and internet services. Three main companies.

Digital technology in the Palestinian territories has expanded methods of government control. Repression now operates through surveillance, censorship, and harassment online. Digital tools enable faster and.

is responsible for providing postal service in , while the is responsible for postal service in the .

During the , telecommunications company Paltel kept its networks online for most of the first six weeks. The company has a in , . As of 2023, Paltel has 750 staff in Gaza, an.

Why are Palestinians not able to access 3G & 4G?

Still, Palestinians in the West Bank and Gaza face significant barriers to digital access imposed by the Israeli occupation. In the West Bank, the Israeli government imposed restrictions on Palestinian telecommunications companies that were only granted access to 3G technology in 2018 and 4G in early 2023.

What happened to the telecommunications infrastructure in Gaza?

Since the siege on Gaza began in 2006, the Israeli government has deliberately targeted the area's telecommunications infrastructure, repeatedly bombing transmission stations, communication towers, and cellular facilities. These attacks, coupled with deliberate power blackouts, have left the telecommunications infrastructure in disarray.

Why is the Internet important for Palestinians in Gaza?

For Palestinians in Gaza, who have endured over 17 years of Israeli blockade and

many more decades of Israeli colonial occupation, the internet serves as a critical lifeline: a channel to communicate with the outside world and share their lived reality with an international audience.

Can Palestinian telecommunications providers import fiber optic cables?

Palestinian telecommunications providers face severe restrictions on importing essential repair equipment, such as fiber optic cables, further compounding the damage caused by Israeli assaults.
